CAREER OBJECTIVE

3rd-year B.Tech (AI & ML) student with hands-on project experience in machine learning, computer vision, and NLP, plus a completed AI internship. Strong foundation in C++ and Python, currently building Java skills and sharpening problem-solving through DSA practice. Seeking an entry-level AI/Software Developer role to apply and grow these skills in a real-world engineering environment.

EDUCATION

B.Tech in Artificial Intelligence & Machine Learning *Ongoing (3rd Year)*
Amity University, Gwalior

TECHNICAL SKILLS

Programming Languages: C++, Python, Java (learning)
AI/ML: Machine Learning, Data Science, Computer Vision, Natural Language Processing (NLP)
Tools & Frameworks: Flask, Git & GitHub, REST APIs
Currently Practicing: Data Structures & Algorithms (DSA)

PROJECTS

Object Detection API — Personal Project (YOLOv8 + Flask)
- Built a REST API using Flask that serves real-time object detection powered by the YOLOv8 model.
- Designed the pipeline to accept image input and return detected objects with bounding boxes via API endpoints.

Real-Time Sentiment Analysis Pipeline — Internship Project
- Developed a Python-based NLP pipeline to classify text sentiment in real time as part of an internship assignment.
- Applied text preprocessing and classification techniques to analyze sentiment from live/streamed text data.

House Price Predictor — Personal Project
- Built a regression-based machine learning model to predict housing prices from historical data.
- Performed data cleaning, feature engineering, and model evaluation to improve prediction accuracy.

Titanic Survival Prediction — Personal Project
- Built a classification model to predict passenger survival using the classic Titanic dataset.
- Applied data preprocessing, exploratory data analysis, and multiple ML classification algorithms.

CERTIFICATIONS & INTERNSHIPS

AI Internship — Codtech IT Solutions Pvt. Ltd. — Artificial Intelligence Domain
- Completed a 4-week internship in Artificial Intelligence, demonstrating strong dedication and technical skills throughout the program.

Python for Data Science — Reliance Foundation Skilling Academy (Skill India)
- Completed an online course covering Python fundamentals for data science applications.

Fundamentals of Artificial Intelligence — Wadhwani Foundation
- Completed a self-paced course covering foundational AI concepts for degree students.
